family safety & health

MEMO TO UTAH PHYSICIANS

As a member of the Utah medical community, I know you are concerned about accidents as a major health problem. Accidents are the leading cause of death to Utahns to age 44. As a physician who treats families, children, parents and parents-to-be, you have a unique opportunity to provide your patients with accident prevention information as a part of a total wellness program. "FAMILY SAFETY & HEALTH" magazine can help you do the job.

"FAMILY SAFETY & HEALTH" focuses on general health and physical fitness, and on preventing accidents. The magazine takes a positive, problem-solving approach to covering health, fitness and safety topics. Readers learn about disease and accident potential, and they learn how to change their lifestyles to reduce their risks.

"FAMILY SAFETY & HEALTH" is easy to read, easy to understand, and full of information for the entire family. THIS QUARTERLY PUBLICATION IS ALSO AFFORDABLE--A YEAR'S SUBSCRIPTION FOR YOUR WAITING ROOM IS JUST \$8.10. Quantity prices are available at substantial reductions if you wish to provide your patients with additional subscriptions. In addition, your subscription will serve as a contribution to the activities of the Utah Safety Council with regard to our work in the enhancement of Utah's safety environment. I am enclosing a sample copy of the magazine along with ordering information. I know that your patients will appreciate the information you provide them through "FAMILY SAFETY & HEALTH" magazine. Please return the order form to start your subscription with the very next issue.

Sincerely,

Robert F. Parenti
Director, Utah Safety Council
